

Additional questions about **using a child safety seat or booster seat**

Do you have a copy of the safety seat instructions?

Call the manufacturer and have instructions sent to you, or get them from their website. The phone number for the manufacturer can be found on your safety seat. If you need help, call Transport Canada at 1-800-333-0510.

Has the seat been involved in a crash?

Child safety seat and booster seat manufacturers say to replace any seat involved in a crash. There may be no signs of damage but small cracks or weakened areas may not work in the next crash.

Has this model ever been recalled?

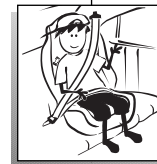

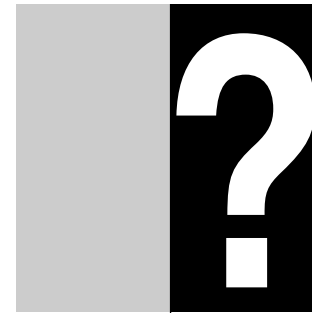

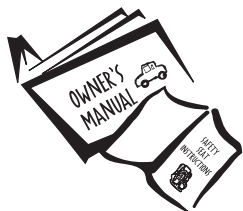

Call the manufacturer, or check their website, with the seat name, model number and date of manufacture to find out if your safety seat has been recalled. Recalls are also available from Transport Canada at 1-800-333-0510 or at www.tc.gc.ca/roadsafety (click on Child Safety).

Read your child safety seat or booster seat instruction book and your vehicle owner's manual to make sure you are using the seat properly. Make every ride a safe ride for everyone.

tips for buying a child safety seat or booster seat

When used correctly, child safety seats and booster seats save lives and reduce injuries. Children can get hurt if their child safety seats or booster seats are not used properly. Here are **some tips on how to buy the right safety seat or booster seat for your child.**

What's holding you back?

Questions to ask when **buying a child safety seat or booster seat**

All safety seats sold in Canada must have a Canada Motor Vehicle Safety Standards (CMVSS) sticker. The best seat for you and your child is the one that you will use properly each time. **Buying a second-hand safety seat is not recommended.**

What types of safety seats are available?

There are three basic types of safety seats for children:

- **Rear-facing seats** are for babies until they are at least one year of age, 22 lb (10 kg) and walking. Do not rush to put your baby in a forward-facing seat. The rear-facing position is the safest. Some child safety seats are designed for rear-facing use up to 40 lb (18 kg).
- **Forward-facing seats** are for children over one, who weigh at least 22 lb (10 kg) and are walking. Keep your child in a forward-facing seat correct for his height and weight until he is at least 40 lb (18 kg). Some forward-facing seats may be used with the 5-point harness up to 65 lb (30 kg).
- **Booster seats** are for children under nine years of age who weigh between 40 and 80 lb (18 and 36 kg) or who are under 4'9" (145 cm) tall. Some booster seats can be used up to 100 lb (45 kg).

Many seats combine more than one basic type.

Is the safety seat the right one for my child?

The manufacturer's instructions and labels on the seat state the weight, size and/or age of child that the seat will protect. The type of seat you should use for your child depends on his/her weight, height and age.

Does the safety seat fit in my vehicle?

Since safety seats come in many sizes, not all seats fit all vehicles. Ask to try putting the seat in your vehicle before you buy it.

Is the safety seat easy to use?

Place your child in the seat and buckle her up. If your baby is not born yet, use a doll or teddy bear. Adjust the harness. If you find it hard to adjust, try a different seat.

Types of child safety seats and booster seats available in Canada

Seat Type	Advantages	Challenges
Rear-facing only, with base 	<ul style="list-style-type: none"> • Has carry handle. Easy to take out of vehicle, even with baby asleep. • Seat base stays in vehicle and if done up correctly, stays tight for every ride. • May be sold as part of a travel system that includes a stroller. 	<ul style="list-style-type: none"> • Your baby may outgrow this seat before she is ready to go forward-facing.
Rear-facing/ Forward-facing 	<ul style="list-style-type: none"> • Can be used as a rear-facing seat and then changed to a forward-facing seat. • Many models have higher rear-facing weight/height limits than rear-facing only seats. • Some models may be used with the 5-point harness up to 65 lb (30 kg). 	<ul style="list-style-type: none"> • Not easy to move in and out of the vehicle. • Larger than rear-facing only seat. It may be hard to fit in some back seats.
Rear-facing/ Forward-facing/ Booster 	<ul style="list-style-type: none"> • Combines all three types of seats. • Many models have higher rear-facing weight/height limits than rear-facing only seats. • Some models may be used with the 5-point harness up to 65 lb (30 kg). 	<ul style="list-style-type: none"> • Not easy to move in and out of the vehicle. • Larger than a rear-facing only seat. It may be hard to fit in some back seats.
Forward-facing/ Booster 	<ul style="list-style-type: none"> • Combines the forward-facing and booster seats. • Good choice for children under 40 lb (18 kg) who are taller than the height limit for the rear-facing/ forward-facing seats. • Some models may be used with the 5-point harness up to 65 lb (30 kg). 	<ul style="list-style-type: none"> • Cannot be used rear-facing.
High-back Booster 	<ul style="list-style-type: none"> • Offers head/neck protection. • Good for vehicle seats without head rests. 	<ul style="list-style-type: none"> • Can only be used with lap-shoulder seat belts. • Can only be used by children over 40 lb (18 kg).
Backless Booster 	<ul style="list-style-type: none"> • Costs less than a high-back booster. • Good for vehicle seat with head rest. 	<ul style="list-style-type: none"> • Can only be used with lap-shoulder seat belts. • Can only be used by children over 40 lb (18 kg).
Adjustable Booster 	<ul style="list-style-type: none"> • Offers head/neck protection. • Good for vehicle seats without head rests. • Easily adjusts as a child grows. • Good for taller children. 	<ul style="list-style-type: none"> • Can only be used with lap-shoulder seat belts. • Can only be used by children over 40 lb (18 kg).
